

ATTACHMENT J42

U.S. Army Fort Bliss, TX (Army Specific Requirements)

The information contained in this attachment is applicable to the U.S. Army Fort Bliss Requirements. However, all other terms and conditions of the RFP remain unchanged.

Section C

Performance Standards

Unless otherwise provided for in this contract, the Contractor shall perform its required service(s) in accordance with industry-standard construction, operations, maintenance, management, environmental, safety, and other relevant standards, that apply to similarly situated utility service customers whose service characteristics are comparable to the service characteristics of the Installation.

Employees

Where reading, understanding, and discussing environmental, health and safety warnings are an integral part of a contract employee's duties, that employee shall be able to understand, read, write, and speak the English language. All employees that interface with customers shall be able to speak and understand the English language.

Contractor Vehicles

All Contractor vehicles shall be readily identifiable. Identification shall include displaying Contractor name in a clear and unobstructed location on the vehicle.

Contractor Radios

Prior to operating two-way, portable, or landmobile devices on the installation, the Contractor shall obtain approval of the Installation Communication Group by requesting an available clear frequency. The Contractor shall follow all installation procedures for operating radios on the installation IAW DFARS 235.071(b).

Underground Utility Location

At the request of the Installation, the Contractor shall be responsible for locating underground utility system components in support of the Installations excavation permit process. Requests for line location shall be responded to within three (3) working days of the request and shall be at no additional cost to the Government.

Work in Environmentally Sensitive Areas

The Contractor shall comply with the Installation procedures and standards for work in and around environmentally sensitive or contaminated property. Prior to accessing any environmentally sensitive areas the Contractor shall coordinate with the Contracting Officers Representative and cognizant environmental representative for the site. The Government will provide the Contractor with updated lists showing environmentally sensitive sites and points of contact.

Environmental Impact Assessments

Any modification of, or other significant action taken with regard to, the utility system within the boundary of the Installation must undergo an environmental impact assessment in accordance with any applicable Installation environmental impact analysis process. The Contractor shall be responsible for conducting this assessment and providing a copy to the Contracting Officers Representative.

Section H

General Liability

Comprehensive general liability insurance on an “occurrence basis” against claims for “personal injury” including without limitation, bodily injury, death, or property damage. Such insurance is to afford immediate minimum protection at all times during the term of this contract and, include limits of liability in amounts approved by the Government, but not less than \$1 million in the event of bodily injury and death to any one or more persons in one accident and, not less than \$500,000 for property damage.

Foreign Object Damage Prevention Program

At Installations that conduct flight operations, all Contractor work in and around any flightline areas must comply with the base’s applicable Foreign Object Damage Prevention Program.

Prior to starting work in these areas, the Contractor shall contact the assigned COR and Administrative Contracting Officer for scheduling of Contractor personnel for required training
